

MID YEAR ECONOMIC AND FISCAL OUTLOOK REPORT

2009

INTRODUCTION

The Mid Year Economic and Fiscal Outlook Report (MYEFO) is released in accordance with the requirements of Sections 9 and 15 of the *Papua New Guinea Fiscal Responsibility Act 2006*.

The purpose of the MYEFO Report is to provide updated fiscal information (especially for the current financial year) to allow the Parliament and the public to assess developments against that set out in the 2009 Budget.

The MYEFO contains the following:

- Part 1: The Mid Year Economic and Fiscal Outlook
 - 1.1 The Economic Outlook
 - 1.2 The Fiscal Outlook
 - 1.3 Revenue
 - 1.4 Expenditure and Net Lending
 - 1.5 Status of Supplementary Budgets
 - 1.6 Status of Trust Accounts
 - 1.7 Financing
 - 1.8 Public Debt
 - 1.9 Risks to the Mid Year Economic and Fiscal Outlook
 - 1.10 2009 and Beyond
 - 1.11 Fiscal Outturn Tables

- Part 2: Mid Year Expenditure Estimates by Agency
 - 2.1 Funded Expenditure Decisions since the 2009 Budget
 - 2.2 2009 Budget Execution
 - 2.3 Reallocation of Appropriated Funds

- Part 3: Appendices

The MYEFO essentially covers central government fiscal operations in what is known as the Government sector. Consistent with the 1986 Government Finance Statistics (GFS) cash reporting framework, the Government sector is defined as covering all units performing government functions, that is, the implementation of public policy through the provision of primarily non-commercial services and the transfer of income, supported mainly by compulsory levies on other institutional sectors.

Government owned or controlled units, which sell industrial or commercial goods and services to the public on a large scale, are excluded from the government sector and are classified separately as non-financial public enterprises. Government owned and or controlled financial institutions are also classified separately from the Government sector as public financial institutions.

The financial information presented in this report is based on the same reporting standards as the 2009 Budget. Generally, this follows the cash reporting standards originally laid down in the 1986 'Manual of Government Finance Statistics' published by the International Monetary Fund.

PART 1

THE MID YEAR ECONOMIC AND FISCAL OUTLOOK

1.1 THE ECONOMIC OUTLOOK

Overview

Gross Domestic Product (GDP) growth is expected to moderate slightly in 2009 following strong economic growth in the past few years. This is in an environment of the worst global recession in the post-World War II era which has driven advanced economies into deep recession, and has substantially slowed growth or seen contraction in emerging and developing economies. Recent economic data suggest that the worst of the global recession may possibly be over, with some international forecasters such as the International Monetary Fund (IMF) upgrading their forecasts of global recovery in 2010.

To date, the PNG economy has been quite resilient given such a challenging environment. This has been assisted by the continued strength in some industries reflecting the benefits from recent microeconomic reforms and the Government's fiscal prudence during the past few years of very strong commodity prices. The Government's fiscal position provides some flexibility in dealing with any further negative shocks that may still arise from the global recession.

The Outlook for the International Economy

The world economy will continue to have a moderating influence on the PNG economy in 2009, with the global recession projected to be deeper than previously thought. The effects from this will continue to be felt through low global demand for PNG exports, impacting both export volumes and prices. The non-mineral sector has proven resilient to global events to date, with growth only moderating slightly. In large part, this can be attributed to the Government's microeconomic reforms, in particular reforms to the communication and transport industry.

Recent data suggest that the significant contraction in the world economy in 2009 may have bottomed out and the worst may be over. A number of international forecasters now anticipate a global recovery in 2010, although still below potential growth. A global recovery in 2010 and beyond will be important in sustaining the strong economic growth seen in PNG over the past few years.

The IMF in its July 2009 Update to the World Economic Outlook (WEO) projected the global economy to begin pulling out of the current deep recession, but the recovery is expected to be uneven and sluggish. The world economy is now estimated to contract by 1.4 per cent in 2009, revised down from a projected contraction of 1.3 per cent in the April 2009 WEO. In 2010, world economic growth is expected to pick up and grow by 2.5 per cent, revised up from 2.1 per cent.

Chart 1: World Economic Growth

Source: International Monetary Fund, World Economic Outlook

Advanced economies are still not expected to show a pick up in economic activity until the second half of 2010, contracting by 3.8 per cent in 2009 before growing by 0.6 per cent in 2010. Emerging and developing economies, on the other hand, are projected to regain growth momentum during the second half of 2009, albeit with notable regional differences. In aggregate, emerging and developing economies are projected to grow by 1.5 per cent in 2009 and 4.7 per cent in 2010.

Public interventions taken by a number of countries appear to have contributed to mitigating the severity of the global recession. Despite these somewhat more positive signs, the IMF stresses that the global recession is not over and although risks have moderated, they remain to the downside.

Global inflation continues to ease with the continued weakness of the global economy. Inflation in advanced economies is forecast to decline to 0.1 per cent in 2009 down from 3.4 per cent in 2008. In emerging and developing countries, inflation has moderated significantly and is forecast at 5.3 per cent in 2009, down from 9.3 per cent in 2008. In 2010, global inflation is expected to remain subdued, held back by significant excess capacity.

At the same time, commodity prices have rebounded ahead of an expected recovery, reflecting improved market sentiments, US dollar depreciation and commodity-specific factors. In the oil market, prices have responded to perceptions that market dynamics are shifting from significant oversupply to more balanced conditions due to improving demand prospects and also Organisation of Petroleum Exporting Countries (OPEC) observance of lower production quotas.

Commodity Prices

The latter half of 2008 saw a dramatic slowdown in global economic activity, as the problems in the financial sector began to work its way into the real sector across a number of economies. As a result, international demand declined rapidly and with it commodity prices, which fell massively below their peaks in 2008. Commodity price movements have remained extremely volatile but have recovered from low points reached in the December quarter 2008 and March quarter 2009, although a lot of uncertainty remains. The global economy remains weak and fragile, but the prospect of a somewhat better outlook has seen commodity markets strengthen from low levels and look a little more settled.

As a result of the subsiding risk and more optimism surrounding the outlook for the global economy to recover in 2010, commodity prices moved higher in the June quarter 2009. The prices of PNG's major mineral exports of gold and copper have traded higher than expected in the first half of 2009. Oil prices have been very volatile and have averaged around \$US 51 per barrel in the first half of 2009, below the Budget assumption of \$US 55 per barrel. While overall commodity prices are better than expected at budget time, lower mineral and petroleum taxes are expected due to lower volumes of production and one-off factors.

Chart 2: Oil price

Chart 3: Copper price

Source: Eco Reuters, PNG Treasury

Through the year to June 2009, the price of copra oil, palm oil and cocoa have decreased by 59 per cent, 42 per cent and 16 per cent respectively. This is despite some pick up of prices in the June quarter 2009. The price of coffee remains strong and rose by 20 per cent in the year to June 2009. Overall, lower agricultural prices are expected to translate into slightly lower growth in the agriculture sector compared to 2008.

Chart 4: Prices of Copra Oil and Cocoa**Chart 5: Prices of Palm Oil and Coffee**

The Outlook for the Domestic Economy

Economic growth in PNG is expected to moderate slightly in 2009 after two years of very strong economic growth - this is despite the negative impact of the global recession (see Box 1). The economy is now expected to grow by a robust 4.8 per cent in 2009. This is lower than the Budget forecast of 6.2 per cent, although revised up from the 2010 Budget Strategy Paper (BSP) forecast of 3.9 per cent. This upward revision since BSP is due to: continued strength in the communication and construction industries; some improvement in the international and commodity price outlook from low recessionary levels; and some additional activity generated by the recently announced early works on the LNG project which are expected to commence in the second half of 2009.

The slight downward revision to the growth forecast since Budget is largely driven by projected downgrades in production from major mines of Ok Tedi and Porgera and some mild easing in growth across a number of the non-mining industries.

The mining sector is expected to record a slight contraction of around 0.1 of a percentage point in 2009 with production from Ok Tedi and Porgera projected to be significantly lower than forecast at Budget. Ok Tedi has experienced some difficulties with one of its processing plants, with maintenance work in June resulting in some loss of production. Porgera has also revised production down due to heavy machinery problems. This is expected to be partially offset by increased production from Lihir and the commencement of the Hidden Valley Gold mine.

Non-mining GDP growth is expected to moderate to 5.3 per cent in 2009, which is slightly lower than forecast at Budget. This is largely driven by lower than anticipated production in the agriculture, forestry and fisheries sector, partially offset by stronger growth in the transport, storage and communication sector.

Chart 6: Economic Growth: 1996 – 2010

Source: Department of Treasury

Growth in the agriculture, forestry and fishing sector is expected to ease in 2009 to around 2.7 per cent due to lower production in coffee, cocoa and copra. In recent years, coffee has experienced higher levels of production, breaking from the usual biannual coffee production patterns. However, growers expect the biannual season pattern to return in 2009. Cocoa production is expected to be lower largely due to the cocoa pod borer, which have affected the cocoa industry in East New Britain. Copra production is expected to decline due to lower prices and unfavourable weather conditions.

Growth in transport, storage and communication is expected to continue to grow strongly in 2009, after very strong growth in the past two years. This has been driven by the rapid expansion in the communication industry and growth forecasts in this sector have been revised up significantly since Budget from 15.0 per cent to 21.5 per cent in 2009.

Activity in the construction sector is expected to remain strong. Businesses continue to prepare for the PNG LNG project, with both commercial and residential construction being underway. The LNG early works will soon commence and this is anticipated to slightly increase activity in the latter half of 2009. The direct impact of the early works will see the building of access roads, bridges and camp sites. In addition, the project is also committed to building training facilities in PNG.

Growth in the other non-mineral sectors such as wholesale and retail trade, manufacturing and community, social and personal services are also expected to moderate slightly from Budget. However, a small rebound in activity is expected to occur in these sectors and others in the latter half of the year with some flow-on benefits arising from the LNG early works. These include the greater need for transport and storage services arising from the movement of people and equipment and additional needs for accommodation and hospitality.

Table 1: Economic Forecasts

	2008 ACTUAL	2009 BUDGET	2009 MYEFO
Economic Growth (%)			
GDP (est)	6.6	6.2	4.8
Non-Mining GDP (est)	7.5	5.6	5.3
Inflation (%)			
Year average	10.6	6.1	7.2
Interest Rate (%)

Gold (US\$/oz)	871.7	600.0	820.0
Copper (US\$/lb)	3.2	1.5	1.8
Oil (Kutubu: US\$/bbl)	97.0	55.0	53.0

Source: Department of Treasury

Other indicators of some moderation in economic growth in 2009 include developments in the labour market. While employment increased by 1.7 per cent in the March quarter 2009, in through-the-year terms growth has been moderating since its peak of 11.8 per cent in September 2007 to be 6 per cent in the year to March 2009 (see Chart 7). Another factor contributing to the moderation in employment growth has been capacity constraints in the labour market, following strong employment growth in the past few years.

Chart 7: Employment Growth (through-the-year)

Source: Bank of PNG Employment Index, Quarterly Economic Bulletin, March 2009

Box 1: The PNG economy in the face of the global recession

2009 is an extremely challenging time for the global economy, with most economies either slowing or contracting.

The International Monetary Fund (IMF) in its July 2009 World Economic Outlook (WEO) update has forecast global activity to contract by 1.4 per cent in 2009. The IMF describes this as the “deepest post-World War recession by far” and acknowledges that significant uncertainties remain, with risks weighed to the downside. Chart 1 shows the progressive downward revisions to IMF world economic growth forecast for 2009 and highlights the dramatic economic impact associated with what started as a global financial crisis.

Chart 8: Revisions to IMF World Economic Growth Forecast for 2009

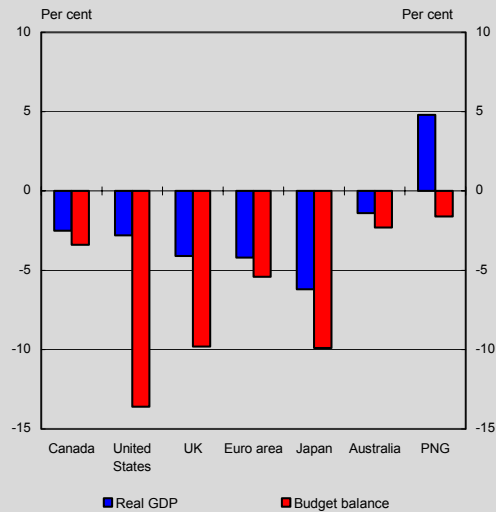

Source: IMF, World Economic Outlook and Updates

A number of economies have contracted and have adopted an expansionary fiscal stance to combat further economic deterioration. This has resulted in significant budget deficits.

Although the global recession has deepened, the PNG economy is expected to grow at a robust rate of 4.8 per cent in 2009 and 5.3 per cent in 2010. Chart 2 shows that PNG does not require further fiscal stimulus as the economy is performing relatively well in this environment.

Chart 9: Economic and Fiscal Outlook for Selected Economies - 2009

Source: IMF, April-09 World Economic Outlook and PNG Treasury

Further expansionary fiscal policies would add to demand and existing inflationary pressures. This would make the economy more vulnerable to the possibility of further negative shocks via higher government debt levels and a weakened external accounts position.

The PNG economy is in a relatively good position to weather the storm. During the commodity price boom the PNG Government has been able to strengthen its fiscal position through adhering to the Medium-Term Fiscal Strategy 2008-12. As a result, part of the commodity windfall has been saved through the build up of funds in trust accounts and reduced public debt. This has provided a stronger and more flexible position for dealing with the global recession.

With the economy expected to grow at robust rate over the forecast period, it is vital that the Government continues to adhere to the medium-term frameworks that have so far helped to shield the economy from the global financial fallout.

Inflation

In 2008, inflation rose significantly to be at 10.6 per cent following a number of years of low and stable inflation. The rise in inflation has been primarily driven by the terms of trade boom, the impact of increased government expenditure, rapid private sector expansion and the strong growth in monetary aggregates. Although the headline inflation figures suggest that inflation began to be a problem in 2008, peaking at 12.9 per cent in the year to the September quarter 2008, the underlying inflation measure shows that inflationary pressures have been building up for some time due to strong domestic activity (Chart 10).

Chart 10: Headline and Underlying Inflation

Chart 11: Credit and Money Supply growth

Source: National Statistics Office, Department of Treasury and Bank of PNG

In response to the worrying inflation situation, monetary policy was tightened in late 2008 and credit growth eased to be 28.0 per cent and money supply growth fell sharply to be 5.4 per cent in the year to the March quarter 2009 (Chart 11). The appreciation of the Kina against the US and especially the Australian dollar in the second half of 2008 also contributed to the easing of the inflationary pressures (Chart 12).

Chart 12: Exchange rate developments

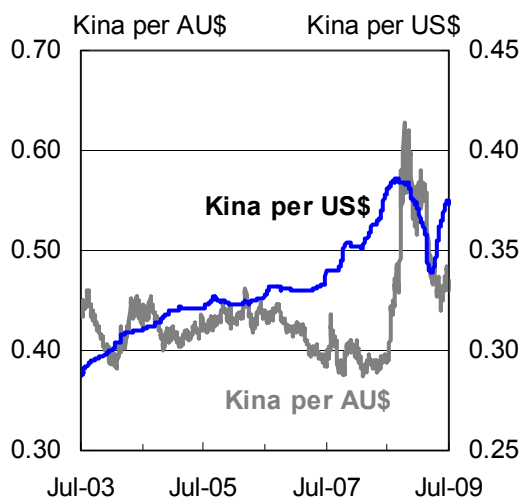

Chart 13: Tradeable and Non-tradeable inflation

Source: Bank of PNG Quarterly Economic Bulletin, March 2009 and Department of Treasury

Chart 13 shows that the strong exchange rate appreciation, particularly against the major trading partner Australia, only had a small moderating influence on imported inflation. This would suggest that the benefits from the exchange rate appreciation were not fully passed onto consumers but instead were used to increase profit margins.

The most recent CPI outcome of a 2.1 per cent rise in the March quarter 2009 and by 10.2 per cent in the year to the March quarter 2009, shows that inflationary pressure remains persistent. The increase in CPI inflation in the year to the March quarter 2009 was largely driven by the increase in the prices of expenditure items such as drinks, tobacco, and betel nut and the miscellaneous group which have recorded an increase of 5.7 per cent and 14.2 per cent respectively during the quarter. The strong growth in the miscellaneous group was largely influenced by school fees paid at the beginning of the school year.

The increase in inflation continues to be broad based, with half of the subgroups recording above trend increases in the March quarter 2009. This was due to both higher imported and domestically generated inflation. Over the past year, prices of imported (or tradeable) goods increased by 9.7 per cent, an increase of half a percentage point from the 9.2 per cent increase recorded in the December quarter 2008. Non-tradeable inflation was 10.6 per cent in the year to the March quarter 2009, easing somewhat from 13.6 per cent recorded in the December quarter, with local foods such as sweet potatoes and other market vegetables contributing significantly to non-tradable inflation.

Inflation is expected to ease in 2009 but still be at an uncomfortably high level of 7.2 per cent. This represents an upward revision to the Budget forecast of 6.1 per cent and a slight upgrade to the 2009 BSP forecast of 6.6 per cent. This reflects the stronger than expected March quarter 2009 outcome, the ongoing strength in domestic demand and the impact of higher government spending. In addition, the strong appreciation of the Kina in the second half of 2008 has also been partially reversed in the first half of 2009, especially against our major trading partner Australia, adding to pressure on tradable inflation. While the international drivers of inflation such as high oil and food prices experienced in 2008 have eased, fuel prices increased in line with the international oil price in the June quarter 2009.

While the gains from high commodity prices have translated into successive years of strong economic growth, it has also become a major source of inflation, providing much of the stimulus that is driving up prices in the economy, and also through the following channels:

- Increased Government expenditure, which is the main channel through which the commodity price boom feeds into the economy. Even though commodity prices have fallen substantially from 2008 highs, Government savings in trust accounts are now being drawn down. The funds in trust represent a large amount of potential stimulus to the economy, so will need to be released carefully over the next few years in order to prevent creating substantial inflationary pressure.
- Rapid private sector expansion, due to improved business confidence, relatively low interest rates and high profitability. The private sector has been growing strongly for a number of years now, with consistently strong employment growth of almost 10 per cent since the beginning of 2006, and near record rates of non-mining GDP growth. However, with the commencement of the early works of the LNG project, this expansion is taking place in an economy that is now facing significant capacity constraints, and is resulting in skill shortages, higher wage demands and an increased willingness to pass higher prices onto consumers.

Looking ahead to 2010, inflation is projected to ease marginally to around 6 per cent. This is expected to reflect more stable credit, money supply growth and exchange rate, as the

tightening of monetary policy takes hold. However, the outlook is very difficult to forecast due to the ongoing volatility in the prices of key commodities. In addition, if the LNG project is given the go ahead at the end of 2009, inflation could be a lot higher over the forecast period. Inflation over the forecast period is expected to be relatively high and will need to be contained if macroeconomic stability is to continue.

Balance of Payments

At the time of the 2009 Budget, it was expected that after a number of years of large current account surpluses, caused by record high commodity prices, and correspondingly high export values, that there would be a dramatic turn around with the global recession in 2009.

The current account moved from a surplus to a deficit position of K197 million in the March quarter 2009. This result was largely due to a fall in the trade balance, with exports falling by 27.4 per cent in the quarter and a smaller net income deficit. However, the trade balance and consequently the current account deficit would have been larger had it not been for a significant fall in the value of imports, which fell by 13 per cent in the quarter.

Consistent with Budget, the medium-term outlook is for the current account to remain in deficit, in line with lower commodity prices and exports values. However, the size of the current account deficit has so far been less than anticipated at Budget, largely as result of lower than anticipated imports and a smaller net income deficit. However, with general confidence in the economic outlook returning, there is the risk that imports may increase in the subsequent quarters. On the other hand, the improved international outlook could also see commodity prices above assumed levels which would lead to higher export values.

At Budget, it was expected that the build up in the Central Bank's international reserves would not continue into the future. Following the sharp fall in the December quarter 2008, the level of international reserves have risen from around US\$2,093 million at the end of December 2008 to around US\$2,229 million at mid-June 2009. This would suggest that capital inflows have exceeded the current account deficit in the first half of 2009.

1.2 THE FISCAL OUTLOOK

The fiscal outlook for 2009 has deteriorated significantly since the 2009 Budget, despite the robust state of the economy.

The updated fiscal estimates for 2009 are set out in the table below. These estimates are made on the basis of no policy changes. For example, these figures do not include any spending initiatives from the LNG Benefit Sharing Agreement.

Table 2: Budget Balance 2008-2009 (Kina Millions)

	2008 Actual	2009 Budget	2009 MYEFO
Total Revenue and Grants	7,073.3	6,666.4	6,342.1
Total Expenditure and Net Lending	7,551.8	6,676.7	6,591.7
Deficit(-)/Surplus (+)	-478.5	-10.3	-249.6
% of GDP	-2.2%	0.0	-1.2%

Source: Department of Treasury

The expected budget position for 2009 is a deficit of K249.6 million or -1.2 per cent of GDP. This is K239.3 million higher than the estimated deficit of K10.3 million at the time of 2009 Budget.

The higher than expected budget deficit is due mainly to lower dividends to the state from Ok Tedi, State Owned Enterprises and the Central Bank.

Table 3 provides a reconciliation of the MYEFO budget balance estimates with those at the 2009 Budget, showing the effect of policy decisions and parameter and other variations.

Table 3: Reconciliation of Budget Balance 2009 (Kina Millions)

	2009

Expenditure	0.0
Total policy decisions	0.0
Effect of forecast and other variations	
Revenue	-324.3
Expenditure	-85.0
Total forecast and other variations	-239.3
2009 MYEFO Budget Balance	-249.6
% of GDP	-1.2

(a) Excluding the public debt net interest effect of policy measures

Source: Department of Treasury

Changes to forecasts and other variations have resulted in an estimated budget deficit of K249.6 million in 2009. There were no main policy decisions since Budget that would have an impact on revenue. The main changes to the forecast and other variations since the Budget that have impacted on revenue are:

- Lower dividends to the State from Ok Tedi , State Owned Enterprises and the Central Bank;
- Higher company and income tax revenues due to higher profitability and inflation; and
- Lower mineral and petroleum tax payments due to lower production and one-off factors, partially offset by the effects of higher copper and gold prices.

The main variations since Budget that have impacted on expenditure that are not from policy decisions are:

- Concessional loans are lower by K41 million due to slower take-up; and
- Grants are K37.8 million lower, due to a slight appreciation of the Kina against the Australia dollar, which has decreased the Kina value of grants.

1.3 REVENUE

Total Revenue and Grants for 2009 are estimated at K6,342.1 million, K324.3 million lower than the estimate published in the 2009 Budget. This primarily reflects a downward revision to Non-Tax Revenue of K375.0 million, partly offset by an upward revision to Tax Revenue of K88.5 million. The variations to the Tax Revenue and the Non-Tax Revenue estimates are discussed below.

Table 4: Tax Revenue 2008 - 2009 (Kina Millions)

	2008 Actual	2009 Budget	2009 MYEFO
Tax on Income & Profits	4,352.6	3,043.9	3,163.2
Domestic Taxes on Goods & Services	992.6	1,114.2	1,123.1
Taxes on International Trade	410.8	456.2	416.4
Tax Revenue	5,756.1	4,614.3	4,702.8

Source: Department of Treasury.

Tax revenues in 2009 has been revised up by K88.5 million since the 2009 Budget to K4,702.8 million. This reflects higher Tax on Income and Profits, partly offset by lower taxes on International Trade. In the first five months of 2009, tax revenue collections were K1,734.5 million, around 3.2 per cent above the trend estimate.

The major factor behind the upward revision to the Tax on income and profits is the K119.3 million upward revision in Personal Income Tax and Company Tax¹. This reflects higher than expected collections of Income and Company taxes and higher inflation relative to the 2009 Budget estimate. In the first five months of 2009, K1,143.3 million of Personal Income tax and Company Tax revenues have been collected, around 6.7 per cent above trend.

The expected growth in Tax Revenue would be even higher, if not for a large overpayment of Mining and Petroleum Tax (MPT) in 2008 of around K150.0 million, which is expected to reduce the next installment of MPT revenue in 2009. In the first five months of 2009, MPT collections totaled K108.6 million, around 37.1 per cent below trend. Higher commodity prices are expected to improve MPT receipts in the second half of 2009.

Compared to recent years, the global financial crisis and the collapse in commodity prices has substantially decreased the share of revenue from MPT and dividends in 2009. Consequently, there will be no additional mineral revenues in 2009 and there will be no additional supplementary budget expenditure for 2009.

Domestic taxes on goods and services in 2009 have been revised up slightly by K8.9 million to K1,123.1 million, due to higher GST collections. In the first five months of 2009, collections were K429.2 million, 1.1 per cent above trend.

Taxes on International Trade have been revised down by K39.8 million to K416.4 million in 2009. This is due to lower than projected export duties, which in turn reflects declining log export as logging companies wind up their operations. In the first five months of 2009, collections of Taxes on International Trade were K162.0 million, around 12.2 per cent below trend.

¹ Refer to Fiscal Outturn Tables on page 24

Table 5: Non-tax Revenue 2009 (Kina Millions)

	2008 Actual	2009 Budget	2009 MYEFO
Property Income	188.0	322.9	50.0
<i>Non Mining Dividends</i>	25.5	195.0	40.0
<i>Mining & Pet. Dividends</i>	162.5	127.9	10.0
Interest & Fees from Lending	1.2	24.0	24.0
Other Non Tax Revenue	93.4	90.9	88.8
Injections from Trust Accounts	-	600.0	500.0
Total	282.6	1,037.8	662.8

Source: Department of Treasury

Non-tax revenue collections are projected to be substantially lower than the 2009 Budget estimate by K375.0 million.

This largely reflects lower Property Income, which is comprised of Non- Mining Dividends and Mining and Petroleum Dividends. Non-Mining Dividend receipts have been revised down by K155.0 million since the 2009 Budget due to lower dividend payments from State Owned Enterprises, Statutory Authorities and the Central Bank. Mining and Petroleum dividends are expected to be K117.9 million below Budget forecasts, due mainly to lower dividend payments from the Government's 15.0 per cent share in Ok Tedi.

Injections from Trust Accounts are K100.0 million lower than expected at the 2009 Budget. This amount was reallocated to other spending priorities at the end of 2008.

The Final components of Total Revenue and Grants (after Tax Revenue and Non-Tax Revenue are Project Grants and Infrastructure Tax Credits (ITC). ITC's are expected to be K40.0 million in 2009, the same as appropriated at Budget, while Project Grants are expected to be K936.5 million, which is K37.8 million lower than the 2009 Budget estimate.

1.4 EXPENDITURE AND NET LENDING

Total expenditure and net lending in 2009 is estimated to be K6,591.7 million, which is K85.0 million lower than the 2009 budget estimate. Recurrent expenditure is broadly unchanged from the 2009 Budget, while Development Expenditure has decreased by K78.8 million, due to reduced projected concessional loan drawdown as well as a slight appreciation of the kina against the Australian dollar.

Table 6: Total Expenditure and Net Lending 2008 - 2009 (Kina Millions)

	2008 Actual	2009 Budget	2009 MYEFO
Recurrent Expenditure	3,766.7	3,904.5	3,898.3
Development Expenditure	1,630.1	2,595.2	2,516.4
Reappropriation into Trust	-	177.0	177.0
Total Expenditure & Net Lending	7,551.8	6,676.7	6,591.7

Source: Department of Treasury

Total recurrent expenditure is estimated to be K3,898.3 million in 2009. This is K6.2 million less than estimated at Budget. In the first five months of 2009, there had been K1,501.3 million of recurrent expenditure, which is 4.3 per cent above trend.

Of the K3,898.3 million recurrent expenditure in 2009, the total expenditure by national departments is expected to be K2,364.5² million, the same as appropriated at Budget. In the first five months of 2009, National Department expenditure was K840.5 million, 0.4 per cent below trend. Of this, salaries and wages were K391.7million, 12.8 per cent above trend. This is due to Nurses backdated salary payments. Goods and services expenditures were K448.8 million, 9.6 per cent below trend.

Total expenditure by Provincial Governments is expected to be K840.2 million in 2009, about the same as appropriated at Budget. In the first five months of 2009, Provincial Government expenditures were K367.1million, 2.8 per cent above trend³. Of this, wages and salary expenditures were K265.0 million, 19.5 per cent above trend. This is also due to the back payment of Nurses⁴ salaries.

In the first five months of 2009, Goods and services expenditures for Provincial Governments were K77.2 million, 28.7 per cent below trend.

Total expenditure by the Autonomous Bougainville Government is expected to be K57.0 million in 2009, the same as appropriated at budget. In the first five months of 2009, expenditure was K24.8 million, 9.5 per cent below trend.

Transfers to Statutory Authorities are expected to be K253.9 million in 2009, the same as estimated at Budget. In the first five months of 2009, expenditure was K136.4 million, 32.1 per cent above trend. This is due mainly to the front loading of cash transfers to Civil Aviation Authority (CAA) for the settlement of their outstanding liabilities and restructure.

Total interest expense for 2009 is estimated to be K386.6 million, compared to the Budget estimate of K392.8 million. The lower than previously estimated interest expense is due mainly to lower interest rates on international debt. In the first five months of 2009, interest expenditure was K157.6 million, 15.5 per cent above trend.

Net lending to Commercial Statutory Authorities (CSA) is expected to be K4.0 million in 2009, the same as at Budget.

Development expenditure in 2009 is expected to be K2,516.4 million, K78.8 million below the Budget estimate of K2,595.2 million. This reflects the downward revision of concessional loan drawdown as well as a slight appreciation of the Kina against the Australian dollar which has decreased the Kina value of grants. In the first five months of 2009, development expenditure was K270.1 million. This is largely because donors have yet to provide their updated expenditure reports. Domestic financed development expenditure was 91.0 per cent below trend in the first five months of 2009.

² This figure is comparable to the National Departments expenditure as shown on page 29. However, the latter figure also includes the reappropriation into trust of K177 million in Division 207. This amount is reported separately in Fiscal Outturn Table 2

³ This includes the expenditure for the Autonomous Bougainville Government. In the Fiscal outturn tables, ABG is shown separate from provinces.

⁴ These are Nurses and Community Health Workers who work in the rural areas and therefore come under the provincial payroll.

Table 7: Development Expenditure 2008 - 2009 (Kina Millions)

	2008 Actual	2009 Budget	2009 MYEFO
Domestic Funding	511.2	1,385.9	1,385.9

1.5 STATUS OF SUPPLEMENTARY BUDGETS

Table 8 shows the status of Supplementary Budgets and Additional Priority Expenditure (APE) from 2006 to 2009 by MTDS sectors. Though some of these aggregated funds were spent directly, the majority of the windfall gains have been appropriated into Trust Accounts for investment purposes on the MTDS priorities.

The Gas Commercialisation Equity Financing trust account was no longer required for its original purpose. Therefore, as part of the 2009 Budget, K423 million was reappropriated from the Trust to other Government priorities in the 2009 budget and K177.0 million was reappropriated into a new trust account. However, after the 2009 Budget was prepared, K100.0 million was used on other Government priorities in 2008.

Table 8: Supplementary Budget Appropriation and Additional Priority Expenditure by sector as at 31st May 2009 (Kina Millions unless specified)

Sector	Approp	Share of		Paid Into Trust	Reallocated to other areas	Lapsed	Yet to be		Total
		Approp (%)	Spent				Released	Released

Source: Department of Treasury and Department of Finance

Of the funds allocated in Supplementary Budgets and APE's as at 31st May 2009, around 59.14 per cent has been paid into Trust Accounts, 34.5 per cent spent directly from the Budget and 3.1 per cent has been reallocated to other areas.

1.6 STATUS OF TRUST ACCOUNTS

A total of K4,438.1 million, up to and including the 2009 Budget, has been appropriated to Trust Accounts for implementation of budget priority expenditure programs.

The purpose of holding funds in these Trust Accounts is to spread the spending over time to control inflationary and demand pressure on the economy as well as give time to the implementing agencies to properly design implementation strategies to carry out the projects.

Table 9 shows the movements of funds in these Trust Accounts for the period 1 January to 31 May 2009.

Of the K4, 438.1 million allocated to Trust Accounts, as at 31 May 2009 K4,105 million has been released by Department of Treasury into Trust Accounts. This is comprised of appropriations into trust accounts from supplementary budgets and additional priority expenditures of K3,752.8 million, K28 million paid into trust accounts in 2008 from the recurrent budget and K324 million paid into trust accounts from the 2009 Budget as at 31 May 2009.

The opening balance as at 1 January 2009 was K2, 901.1 million. Deposits for the period 1 January – 31 May 2009 totaled K394.7 million. This includes Interest and Other Deposits received totaling K70.4 million. Expenditure incurred for the period 1 January – 31 May 2009 totaled K905.4 million, and the closing balance of Supplementary Budget Trust Accounts at 31 May 2009 was K2, 390.4 million.

Under the Medium Term Fiscal Strategy 2008-12 (MTFS), Government spending from trust accounts and additional mineral revenue is limited to 4 per cent of GDP per annum, which equates to K848.9 million in 2009. This rule is designed to smooth expenditure over time to help contain demand and inflationary pressures. As there is no additional mineral revenue expected in 2009, up to this amount will be sourced entirely from trust accounts.

Total expenditure from trust accounts was K905.4 million as at 31 May 2009, which represents 4.3 per cent of GDP. This exceeds the maximum level of trust expenditure permitted in 2009 under the MTFS of 4 per cent.

However, this amount includes K423 million from the Gas Commercialisation Equity Financing trust account, which was returned to consolidated revenue in the 2009 Budget to fund additional recurrent and development expenditure. Furthermore, the 2009 Budget included payments into trust of K356 million to fund the District Service Improvement Program (DSIP). It is arguable that a large part of the K423 million from the Gas Commercialisation Equity Financing trust account was reallocated to another trust account, which does not constitute expenditure under the MTFS.

Excluding the K423 million paid from the Gas Commercialisation Equity Financing trust account, total expenditure from trust accounts as at 31 May 2009 was K482.4 million. This represents 2.3 per cent of GDP and 53.3 per cent of allowable trust expenditure in 2009 under the MTFS.

Accordingly, expenditure from trusts in the first five months of 2009 has accelerated relative to previous years, even after excluding the K423 million from the Gas Commercialisation Equity Financing trust account. Total trust expenditure will need to be watched closely in the second half of 2009 to ensure that the MTFS rule is not breached.

⁵ Credits – Payments made into Trust

⁶ Debits – Payments made out of Trust

⁷ Appropriation (Recurrent Expenditure 2009) Act 2008 requires the establishment of a LNG Project Development Cost Trust Account and the transfer of K177 million from Government's Gas Commercialisation Equity financing Trust Account during 2009. As at 31 May 2009, this Trust Account has not been established and the funds have not been transferred.

Expenditure from trust accounts in 2009

Following is a summary of expenditure from Supplementary Budget Trust Accounts for the period 1 January – 31 May 2009:

- **K11.5 million was spent from the Airport Repairs and Upgrade Trust Account.** No financial or project reporting has been provided by the Implementing Agency, Civil Aviation Authority of PNG, to the Department of Finance since the inception of this Trust Account, therefore no details of expenditure can be provided in this report.
- **K0.3 million was spent from the Kubalia High School Rehabilitation Trust Account** for the infrastructure rehabilitation of Kubalia High School.
- **K51.9 million was spent from the Education Sector Infrastructure Rehabilitation Trust Account** for infrastructure rehabilitation of Schools around the country. No financial or project reporting has been provided by the Implementing Agency, Department of National Planning to the Department of Finance therefore no details of expenditure can be provided in this report.
- **K1.8 million was spent from the Higher Education Sector Infrastructure Rehabilitation Trust Account** for the four Universities' infrastructure.
- **K1.6 million was spent from the National Parliament Infrastructure Rehabilitation Trust Account** for the Parliament House infrastructure improvement.
- **K3.0 million was transferred from the Outstanding PBSS (Police) Trust Account** into PNG Constabulary Communication and Infrastructure Trust Account following the settlement of all outstanding PBSS payments in 2007. K20 million was appropriated in which K17 million was used for this purpose whilst the remaining K3 million was paid into PNG Constabulary Communication and Infrastructure Trust Account.
- **K88.1 million was spent from the Transport Sector Infrastructure Rehabilitation Trust Account** for the roads and ports and jetties' infrastructure maintenance and rehabilitation around the country.
- **K2.0 million was spent from the PNG Gas Development and Commitments Trust Account** for business development grants to incorporated companies of landowners.
- **K3.4 million was spent from the Resettlement of Volcano Victims Trust Account.** No financial or project reporting has been provided by the Implementing Agency, East New Britain Provincial Government, to the Department of Finance since the inception of this Trust Account therefore no details of expenditure can be provided in the report.
- **K2.7 million was spent from the Hospital and Healthcare Centre Rehabilitation Trust Account** for hospitals and health care centres' infrastructure maintenance and rehabilitation.
- **K6.6 million was spent from the Rehabilitation of Housing for Police Trust Account** for the maintenance and rehabilitation including construction of new housing for policemen and women around the country.
- **K18.5 million was spent from the Highlands Highway Rehabilitation Trust Account** for the highlands highway rehabilitation program.

- **K152.4 million was spent from the District Service Improvement Program Trust Account** during this period for the sub-programs under the DSIP. The expenditure is the total for the period spent around the country.
- **K13.0 million was spent from the Agriculture Sector Development Trust Account** for various agricultural programs/projects around the country.
- **K15.5 million was spent from the Strategic District Markets Infrastructure Trust Account** for various district markets infrastructure around the country.
- **K50.8 million was spent from the Law and Justice Sector Infrastructure Rehabilitation Trust Account** for the rehabilitation of infrastructure of the Law and Justice Sector in the country.
- **K1.0 million was spent from the NBC Infrastructure Rehabilitation Trust Account** for the rehabilitation of NBC's infrastructure around the country.
- **K0.1 million was spent from the Nurses Housing Trust Account.** This expenditure was mainly for administration and preliminary work.
- **K6.1 million was spent from the Housing Development Pilot Trust Account** for the construction of houses at Gerehu 3B in the Nation's Capital.
- **K4.0 million was spent from the Cooperative Societies Establishment Trust Account** for the establishment of various Cooperative Societies around the country.
- **K1.5 million was spent from the Madang Marine Park Development Trust Account** for the development of the Pacific Marine Park (formerly Madang Marine Park) in Madang.
- **K13.8 million was spent from the National Infrastructure Development Program Trust Account.** This expenditure was for the Highlands Highway rehabilitation program.
- **K0.2 million was spent from the Regional Provincial Treasury and District Administration Offices Trust Account** for the initial work on the establishment of Regional Offices that will administer the Provincial and District Treasuries' operations.
- **K5.1 million was spent from the Finance Commission of Inquiry Trust Account** for the commission of inquiry into the Finance Department.
- **K30.5 million was spent from the Outstanding MOA Commitments Trust Account** for the MOA Commitments to the resource Provinces of Southern Highlands and Gulf Provinces.
- **K423.0 million was transferred into Waigani Public Account (WPA) from the Government's Gas Commercialization Equity Financing Trust Account** for financing the shortfall in the Budget.

- There was no expenditure for the period 1 January – 31 May 2009 for the following Trust Accounts:
 - Outstanding PBSS (Teachers) Trust Account
 - Institutional Housing Pilot Trust Account
 - Urbanization Pilots Trust Account
 - Rural Electrification Trust Account
 - Konebada Petroleum Park Trust Account
 - National Border Authority Trust Account
 - Land Reform Program Trust Account
 - National Stadium Trust Account
 - LNG Project Development Cost Trust Account
 - Oro Restoration Authority Trust Account.

Appropriation for National Stadium, LNG Project Development Cost and Oro Restoration Authority Trusts were not paid into Trust as at the date of this report.

Further detail of expenditure from Supplementary Budget Trust Accounts is provided in Appendix 2.

1.7 FINANCING

The budget deficit is expected to be K249.6 million in 2009, compared with the original estimate of K10.3 million, which means that the total financing requirement for 2009 will be K249.6 million. Domestic financing of K265.4 will fund the deficit, in line with the Debt Strategy, while external financing is expected to be negative K15.8 million.

1.8 PUBLIC DEBT

Total public debt outstanding is expected to be K7,185.4 million or 33.9 per cent of GDP at the end of 2009 compared to the original budget estimate of K6,261.3 million or 29.6 per cent of GDP. This reflects increased borrowing to finance the 2008 budget deficit, as well as the deficit projected for 2009.

Table 10: Public Debt (Kina Millions)

	2008 Outcome	2009 Budget	2009 MYEFO
Domestic	4,095.9	3,544.9	4,361.4
Treasury Bills	1,742.8	927.9	1,908.9

1.9 RISKS TO THE MID YEAR ECONOMIC AND FISCAL OUTLOOK

The forward estimates of revenues and expenditure in this report incorporate assumptions and judgments based on information available at the time of publication. A range of factors may influence the final budget outcome for 2009. With the global financial crisis still lingering on confidence and with significant uncertainty in the commodity markets, commodity prices and revenue projections could easily change. Change in production levels will also affect revenue projections, if there are disruptions to supply or changes in other economic variables. Most importantly, the volatile nature of commodity prices presents the key risk to revenue forecasts. Expenditure forecasts could vary if there are under spends, new appropriations, changes under standing appropriations and the realization of certain contingent liabilities.

There has been an air of optimism about the PNG LNG project in recent times and with milestones such as the UBSA reached in May and the early works soon to get off the ground in the later part of the year, the private sector is increasingly becoming confident that the LNG project will proceed as scheduled. That confidence is expected to transform into some activity in 2009, and a great deal more in 2010 and beyond if the project moves into full operation.

However, there are still risks surrounding the successful delivery of the project. The key risks to the project surround securing project finance and landowner issues which can be very complex.

The world economic outlook is for continued contraction in growth in 2009 with the IMF revising growth to -1.4 per cent for the year in the July WEO however, growth is forecast to rebound to 2.5 per cent in 2010 with many predicting the worst to pass in 2009. Although the IMF has revised growth projections up for 2010 from 2.1 to 2.5 per cent, they expect the pace to be slow and uneven.

For all of the above reasons, some degree of uncertainty is attached to the estimates of both revenue and expenses in 2009. While the MYEFO estimates are prepared with the benefit of knowing some revenue and expenditure outcomes for the early months of the budget year, which in general tend to reduce forecast errors, substantial uncertainties nevertheless remain.

1.10 2009 AND BEYOND

The revised economic and fiscal forecasts for 2009 and the commodity price assumptions that underlie them will impact on 2009 and beyond. Economic and fiscal projections for the period 2009 to 2014 will be updated in the 2010 budget. These projections will incorporate updated forecasts and decisions taken by the Government concerning the 2010 Budget Strategy Paper.

2.2 2009 BUDGET EXECUTION

The issue of warrants by the Department of Treasury governs the rate and timing of expenditure by agencies. In managing the issue of warrants, Treasury must balance the management of the Government's overall cash requirement with the requirement of agencies for cash to deliver their authorized programs.

As of 31 May 2009, a total of **K5,112.4** million of warrants have been issued from both the Recurrent and the Development Budget. This represents 71 per cent of the recurrent and development appropriations of **K7,158.5** million for 2009.

Some **K2,074.3** million of the warrants issued from the Recurrent Budget are for debt servicing. Excluding debt servicing, a total of **K3,038.1** million warrants have been issued up

to 31 May 2009 from the full year recurrent and development appropriations. This represents 60 per cent of the total non-debt servicing appropriation for 2009.

The recurrent budget warrants total **K4,692.4** million. This is made up of **K1,711.0** million for national departments, **K139.9** million for statutory authorities, **K767.2** million for provincial grants including staffing grants and **K2,074.3** million for debt servicing.

To 31 May 2009, expenditure incurred from the warrants released for the national departments was **K839.1** million, which was 49 per cent of the warrant released and 33 per cent of the appropriation.

A further **K136.4** million was incurred as expenditure for the statutory authorities. This was 98 per cent of the warrants released and 54 per cent of the appropriation.

For the provincial grants, a total of **K367.0** million was incurred. This was 48 per cent of the warrants released and 41 per cent of the appropriation.

For debt servicing the full warrants of **K2,074.3** million were issued and expenditure to end of May was **K1,057.3** million. This was 51 per cent of the appropriation.

The development budget warrants total **K420.0** million. This is made up of **K329.2** million for national departments, **K48.1** million for statutory authorities, **K42.7** million for provincial projects.

To 31 May 2009, expenditure incurred from the warrants released for the national departments was **K205.6** million, which was 63 per cent of the warrant released and 28 per cent of the appropriation.

A further **K35.1** million was incurred as expenditure for the statutory authorities. This was 73 per cent for the warrants released and 26 per cent against the appropriation.

For the provincial projects, a total of **K21.9** million was incurred. This was 51 per cent for the warrants released and 4 per cent for the appropriation.

The large proportion of warrants issued to 31 May 2009 reflects the revised arrangements by Treasury for the early release of warrants. This arrangement was first trialed in 2008 as a means of assisting National Departments, Statutory Authorities and Provincial Governments with their effective implementation of Government programs.

Tables below on pages 29 – 34 provide the amounts of warrants issued to agencies up to 31 May 2009.

2.3 REALLOCATION OF APPROPRIATED FUNDS

Sections 3 and 4 of the annual appropriation acts provide that, in certain circumstances, there may be a reallocation of funds appropriated to agencies at the discretion of the Secretary of the Treasury.

In practice, this discretion allows unexpended appropriation to be reallocated through the Secretary's Advance to meet the cost of unbudgeted expenditure that is urgent, unavoidable and unforeseen, up to the limit of the Secretary's Advance (Section 3 transfers), or reallocated between services subject to an overall limit of 10 per cent of the total appropriation for recurrent expenditure (Section 4 transfers).

To 31 May 2009, K226.8 million has been reallocated through these mechanisms. These constitute approximately 4 per cent of the recurrent appropriation. K208.9 million relates to transfers between items within the total appropriation for an agency. A further K17.9 million has been allocated through the Secretary's Advance (further details of these payments are in Table 21 below).

DETAILS OF EXPENDITURE FROM SECRETARY'S ADVANCE

An amount of K20.0 million was appropriated to Secretary's Advance in the 2009 Budget. The following table sets out the allocations made from the Secretary's Advance from 1 January 2009 up to 31 May 2009.

Table 21: Expenditure from Secretary's Advance

Division		2009 Budget K'000	2009 MYEFO K'000
207	Original Appropriation	20,000.0	
	Total Funds Available From Secretary's Advance	20,000.0	
	Pacific Islands Forum Leaders Meeting held in Port Moresby on 27 January 2009		614.9
	Funeral expenses for the Late Mr Monty Derari – Oro Province Administrator		202.1
	Settlement of various Timber Rights Purchase Agreements for the Jimi River area in the Western Highlands Province and the Timber Rights Purchase Agreement for Extended Mengen area in the East New Britain Province		698.6
	Payment of Land compensation for Brandi High School and Wewak Town Water Supply		668.0
	Billiard and Snooker Champions		200.0
	Kickboxing Title held on 25 April 2009		200.0
	Payment to settle National Gas Corporation LTD stale cheques		200.0
	Purchase and supply of medals for the Queens Honour Ceremony (Office of Governor-General)		1,900.7
	Contribution to Team PNG's participation in the Arafura Gamers		400.0

*The Expenditure Summaries contained in this report have not been reconciled back to the Bank Balances as at 31 May 2009. Variances are the result of interest income, bank fees and timing differences on the presentation of cheques.

There were no expenditures recorded for the period 1 January to 31 May 2009 for the following Trust Accounts:

- Outstanding PBSS (Teachers) Trust Account
- Urbanisation Pilots Trust Account
- Institutional Housing Pilot Trust Account
- Rural Electrification Trust Account
- Konebada Petroleum Park
- Land Reform Program Trust Account
- National Border Authority Trust Account

Appropriation (Recurrent Expenditure 2009) Act 2008 requires the establishment of an LNG Project Development Cost Trust Account, and the transfer of K177 million from Government's Gas Commercialisation Equity Financing Trust Account during 2009. This Appropriation also requires the establishment of a National Stadium Trust Account and an Oro Restoration Authority Trust Account and the Transfer of K20 million for both accounts. As at 31 May 2009, these Trust Accounts have not been established and the funds have not been transferred.
